On June 30, 1952 (Minute Page 1588, Item 42), the Commission authorized the issuance of an oil and gas lease to the Standard Oil Company of California for a 960-acre parcel of tide and submerged lands in the Montalvo area, Ventura County, subject to the approval by the Department of Interior to the issuance of the lease under the terms of the Stipulation entered into by the Attorney General of the United States and the Attorney General of California on July 26, 1947, as extended. Pursuant to this authorization, approval of the Secretary of Interior to the issuance of the lease was requested on July 17, 1952. This approval was granted November 14, 1952, and the lease has been issued.

Under the established policy of the Commission, the date of issuance of a lease is the date of authorization by the Commission to the Executive Officer, in this instance June 30, 1952. Section 6, Exhibit "A", of the proposed lease requires that "within forty-five (45) days from and after the date of this Lease the Lessee shall commence operations for the drilling of a well..." In view of this requirement, and other requirements for diligence of operations after the date of the lease, and because of the long delay in the issuance of approval by the Secretary of the Interior, the successful bidder, Standard Oil Company of California, has requested that a current date be established as the effective date for initiation of all lease operating requirements.
