APPLICATION FOR DREDGING PERMIT, SUBMERGED LANDS, BELMONT SLOUGH, SAN MATEO COUNTY; REDWOOD CITY GENERAL IMPROVEMENT DISTRICT NO. 1-64 - W.O. 6218.

An application has been received from the Redwood City General Improvement District No. 1-64, for a permit to dredge approximately 80,000 cubic yards of material from an area of submerged lands in the bed of Belmont Slough, San Mateo County. The project is designed to widen and deepen the slough to improve navigation and flushing at all stages of the tide. The major portion of the spoil will be disposed of on Redwood Peninsula. The remainder of the spoils will be used for realignment and improvement of the dikes along a portion of the slough.

Section 6303 of the Public Resources Code provides that when an applicant has a permit from the federal government, the Commission may grant the privilege of depositing material upon, or removing or extracting material from, tide or submerged lands owned by the State for the improvement of navigation, upon such terms and conditions and for such consideration as will be for the best interests of the State.

The U. S. Corps of Engineers is expected to act upon issuance of a Department of the Army permit on or about November 18, 1966, authorizing the conduct of dredging operations at the location described in the application. The Division of Beaches and Parks has reported that it has no objection to issuance of the permit. The Department of Fish and Game has stated that it has no opposition to approval of the application; however, it strongly recommends that the entire remaining development of the area be viewed as part of the San Francisco Comprehensive Plan and that necessary measures for the protection of fish and wildlife be planned for incorporation into the total development prior to approval by that Department of individual project segments. The Department of Water Resources has determined that the proposed work will not affect the resources within the Department's interest and responsibility.

The San Francisco Bay Conservation and Development Commission has approved the proposed dredging.

The District has agreed to a royalty of 5¢ per cubic yard for the materials to be extracted under this permit. It is anticipated that subsequent dredging projects will be the subject of new applications which will be reviewed for their conformity with existing Commission policy and appropriate legal requirements. The District has agreed to a \$25,000 bond. Since adverse claims have been made to a portion of the areas being leased, provisions have been inserted for the protection of the State. The District agrees to hold the State harmless in the event of failure of title.

IT IS RECOMMENDED THAT THE COMMISSION AUTHORIZE THE EXECUTIVE OFFICER TO ISSUE A PERMIT IN ACCORDANCE WITH THE TERMS AND CONDITIONS SET FORTH IN EXHIBIT "A" TO REDWOOD CITY GENERAL IMPROVEMENT DISTRICT NO. 1-64 TO DREDGE APPROXIMATELY 80,000 CUBIC YARDS OF MATERIAL FROM AN AREA OF SUBMERGED LANDS IN THE BED OF
