APPLICATION FOR DREDGING PERMIT, TIDE AND SUBMERGED LANDS, RUSSIAN RIVER, SONOMA COUNTY; UTAH CONSTRUCTION AND MINING COMPANY - W.O. 6313.

An application has been received from the Utah Construction and Mining Company for a permit to dredge approximately 158,000 cubic yards of material from the mouth of the Russian River. The proposed dredging will permit access through the mouth of the river to an area upstream that is presently under lease by the applicant. Applicant is required by the terms of said lease (P.R.C. 3502.1, issued June 28, 1966) to dredge the opening within nine months thereof. The material to be dredged will be transported seaward and redeposited on State Lands.

Section 6303 of the Public Resources Code provides that when an applicant has a permit from the federal government, the Commission may grant the privilege of depositing material upon, or removing or extracting material from, tide or submerged lands owned by the State for the improvement of navigation, upon such terms and conditions and for such consideration as will be for the best interests of the State.

The U. S. Army Corps of Engineers has issued a permit authorizing dredging at the proposed location. The Department of Parks and Recreation, Division of Beaches and Parks, has stated that the permit would have no effect upon any project or program of that Department; however if the dredging will in any way affect the State Beach, an agreement with that Department will be required.

The Department of Fish and Game has reviewed the application and believes that fishery resources will be protected if the conditions of P.R.C. 3502.1 are adhered to.

IT IS RECOMMENDED THAT THE COMMISSION AUTHORIZE THE EXECUTIVE OFFICER TO ISSUE A PERMIT TO UTAH CONSTRUCTION AND MINING COMPANY TO DREDGE APPROXIMATELY 158,000 CUBIC YARDS OF MATERIAL, WITHOUT PAYMENT OF ROYALTY, FROM AN AREA OF STATE-OWNED TIDE AND SUBMERGED LANDS NEAR THE MOUTH OF THE RUSSIAN RIVER, SONOMA COUNTY, AND .
