PROSPECTING PERMIT

APPLICANT: Vinnell Mining and
Minerals Corporation

TYPE OF LAND: School land.

AREA AND LOCATION:
Section 16, T17N, R13E, SBB&M, Clark Mountain
Area (approximately 90 miles east of Barstow).

PROPOSAL: To evaluate the potential for mineral values
other than oil, gas, and geothermal resources
of the subject lands. The primary exploratory
objective is to determine if flourspar

California, and the use of acid-spar exceeds
the use of met-spar.

METHOD OF EXPLORATION:
The exploration program has been defined
in 3 phases. Phase I consists of surface
geological mapping, taking 2 men 60 days
to complete. Phase II will include the
construction of shallow trenches. The trenches
will be approximately 20' to 30' long,
2' wide and 1' deep, with all trenches
being filled when sampling is complete.
Phase III will consist of an estimated
30 core holes to be drilled to a depth
of 100 to 125 feet.

PREREQUISITE TERMS:

1. The required filing fees and the \$1
per acre deposit have been paid by
the applicant.
