GENERAL PERMIT
RECREATIONAL AND RESIDENTIAL USE
PAUL R. AND ETHEL SCHNEIDEWIND

On April 1, 1868, the State issued Tideland Survey Numbers 10 and 11, Solano County. In ensuing years, without boundaries being exactly known, the patented area was subdivided into numerous small lots which were developed as homesites built upon pilings. Access to the homesites is by a boardwalk that was extended as new sites were developed. The developments were modest in the beginning, with rambling porches and decks replacing normal yards.

The boundaries of the Tideland Surveys were litigated in November 1945, without the State being a party to the suit. The State Lands Commission surveyed the private judgement line completing the survey in July 1955 (W.O. 1942-C).

It was found that many of the porches and decks extended beyond the low water line, and in some cases, slivers or corners of the houses encroached beyond the line. During the latter 1950's, all the encroachments were put under lease by the Commission.

In the late 1960's, when the initial leases expired, the Commission declined to extend them because of sanitation problems associated with sewage. The residents formed an association and put in a sewer trunk line, individual connections, and a lift pump to deliver the sewage into the Vallejo system. The houses and appurtenances have increased greatly in value and are being sold by present owners. Title companies and finance institutions have advised the owners that they must secure a new lease from the State Lands Commission to have acceptable title.

Paul R. and Ethel Schneidewind have applied to the Commission for a lease of whatever State-owned lands may be covered by the improvements located at Number 39 Sandy Beach Road.

CALENDAR ITEM NO. C.O. 5 (CONTD)

The proposed lease includes the patented tidelands, subject to the public trust, and the area waterward of the adjudicated low water line. Rental is charged only upon the area waterward of the low water line. The recommended term is 20 years.

As the proposed lease involves a relatively minor, long-standing encroachment and will not change or expand upon presently existing conditions, and does not appear to constitute a nuisance, staff recommends issuance of the permit as appropriate in light of these limited circumstances.
