SIXTH MODIFICATION OF THE  
1983-1984 PLAN OF DEVELOPMENT AND OPERATIONS AND BUDGET  
LONG BEACH UNIT, WILMINGTON FIELD  
LOS ANGELES COUNTY

The City of Long Beach, as Unit Operator, has requested approval of the Sixth Modification of the 1983-1984 Plan of Development and Operations and Budget, Long Beach Unit. This modification would provide for an alternate source of high pressure water at the north end of the Pier J. The estimated cost of this high pressure injection water addition is \$960,000 with the Long Beach Unit and LBOD sharing the cost 75% and 25%, respectively. No augmentation is requested at this time therefor the Budget will remain at \$258,657,500.

There is currently a problem delivering sufficient injection water to the Unit J-1 well site and LBOD in this area from the Pier J injection plant operated by L.B.O.D. The Unit Operator anticipates that injection requirements will increase. As a temporary measure idle hydraulic lift system pumps near the injection plant have been placed into operation but these pumps are inefficient for long term use. The proposed modification on Pier J is to meet existing and future demands and to provide at least partial backup to the present plant.

While neither a budget transfer nor augmentation is requested at this time, additional funding may be required for the Water Injection Program this budget year.

IT IS RECOMMENDED THAT THE COMMISSION APPROVE THE SIXTH MODIFICATION OF THE PLAN OF DEVELOPMENT AND OPERATIONS AND BUDGET, LONG BEACH UNIT, JULY 1, 1983 THROUGH JUNE 30, 1984, SUBJECT TO APPROVAL OF THE EXECUTIVE OFFICER OR DELEGATE OF THE FINAL PLANS FOR THIS PROJECT.
