OTHER PERTINENT INFORMATION:

1. Lease PRC 6139.9 was issued by the State Lands Commission for the installation of a tidegate structure and appurtenances in the Salinas River. The installation of the tidegate structure and culverts has unexpectedly resulted in water levels remaining higher than their historical levels during certain periods of the year and therefore is adversely affecting upstream agricultural fields. To alleviate the problem, the Flood Control District is proposing to add agricultural drains at the subject site. The project will involve installation of an access ramp and additional riprap as well.
2. The annual rental value of the site is estimated to be \$100.
3. Pursuant to CEQA and the State CEQA Guidelines, a Negative Declaration was prepared and certified by the County of Monterey, which found that the project will not have a significant effect on the environment.
4. The project is situated on lands identified as possessing significant environmental values pursuant to F.R.C. 6370.1 and is classified in a use category "A" which authorizes Restricted Use. The project as proposed will not have a significant effect upon the identified environmental values.

CALENDAR ITEM NO. 609 (CONTD)

5. Since the additional work is an extension of the original tidegate structure and is necessary to alleviate flooding problems caused by that installation, the staff is recommending that the processing fee be waived.

EXHIBITS: A. Land Description.
 B. Location Map.
 C. Negative Declaration.

IT IS RECOMMENDED THAT THE COMMISSION:

1. DETERMINE THAT A NEGATIVE DECLARATION HAS BEEN PREPARED FOR THIS PROJECT BY THE COUNTY OF MONTEREY.
