CLAIRE T. DEDRICK

10/24/85

PLACEMENT OF JACKET FOR CHEVRON'S PLATFORM "EST" FR FRC 3095
BELMONT OFFSHORE FIELD, ORANGE COUNTY

ON COLUMBUS DAY, OCTOBER 14, 1985, IN THE EARLY HOURS OF THE MORNING, CHEVRON USA TOOK THE FIRST MAJOR STEP IN REPLACING THE STORM DESTROYED (MARCH 1 AND 2, 1983) OFFSHORE OIL AND GAS DRILLING PRODUCTION FACILITY KNOWN AS ISLAND "ESTHER". A LARGE STEEL TRUSS/Framework MEASURING 250' LONG X 39' WIDE X 35' HIGH WAS PLACED BETWEEN THE ROWS OF EXISTING WELLS TO SERVE AS THE BASE SECTION OF THE NEW PLATFORM. AFTER 48" DIAMETER STEEL PILING ARE DRIVEN THROUGH THE BASE SECTION (OR "JACKET") TO APPROXIMATELY 120' BELOW THE ORIGINAL SEA FLOOR, THE TWO DECKS WILL BE INSTALLED IN FOUR PREASSEMBLED SECTIONS, RESULTING IN A STRUCTURE 175' LONG X 84' WIDE X 58' HIGH (ABOVE SEA LEVEL).

IT IS ESTIMATED THAT THIS INSTALLATION WORK OF THE PLATFORM AND THE HOOK-UP OF THE PRODUCTION HANDLING FACILITIES, ALONG WITH THE INTEGRATED SAFETY SHUT-DOWN SYSTEM WILL CONTINUE ABOUT FOUR MONTHS, OR INTO FEBRUARY 1986. NEAR THE END OF THIS PERIOD, A DRILLING WORKOVER RIG WILL BE INSTALLED ON THE PLATFORM TO BEGIN THE REPAIR AND RECONDITIONING OF THE WELLS WHICH IS EXPECTED TO REQUIRE FOUR OR MORE MONTHS. PRODUCTION OF OIL WILL PROBABLY BE RESUMED ABOUT JUNE 1, 1986 AND CHEVRON HOPES TO EVENTUALLY ACHIEVE 1,000 BBLs OIL PER DAY (PRE-1983 RATE WAS 1850 BOPD).
