OTHER PERTINENT INFORMATION:

1. The Waddell Bluffs is an area in Santa Cruz County on State Highway Route 1, where talus rock material continually falls onto the Highway Right-of-Way. The California Department of Transportation has found that the most economic method of safely disposing of material is to periodically deposit it in the surf zone adjacent to the Bluffs. Those deposits are made annually during the months of heavy storms and tidal conditions, thereby allowing wave action to disperse the material as was done naturally prior to Highway construction. This talus material is a Santa Cruz mudstone that is brittle, and is converted by wave action into sandy material that is transported downcoast and dispersed along existing beach areas. Staff contacted the Department of Parks and Recreation (regional manager and Headquarters personnel) to verify that Department of Parks and Recreation is aware of the proposed California Department of Transportation project. Staff was informed that Parks has knowledge of the project, and has no objection.
2. The annual rental value of the site is estimated to be \$297.
3. An environmental analysis document was prepared, circulated, and adopted for this project by the California Coastal Commission, Central Coast Area as provided under P.R.C. 21080.5 and 14 Cal. Adm. Code 15251(c).
