1. The Department of Fish and Game proposes to conduct a fish and wildlife enhancement program along a portion of the Colorado River that includes lands under the State Lands Commissions jurisdiction. The project will consist of installing an artificial fish habitat within Beal Slough to enhance fish breeding and protection. Those habitat improvements will include brush shelters, anchored logs, boulder reefs, and spawning gravel. Shoreline habitat will also be increased by the planting of willows, cottonwoods and bulrush.
2. The annual rental value of the site is estimated to be \$800.
3. The Applicant has requested waiver of the \$450 processing cost for this transaction; the State's sovereign lands will share in the benefits of this habitat restoration project. Additionally, Applicant periodically inspects and manages the Commission's lands and habitat areas due to the isolated location of such lands. Commission staff recommends waiver of the normal \$450 processing cost in this instance.
