OTHER PERTINENT INFORMATION:

1. Applicant has applied to install a walkway on an existing jetty located at the south end of the entrance to Channel Islands Harbor. During the processing of the application, staff discovered the existing jetties and breakwater structures at Channel Islands Harbor were not under permit. The structures were installed in 1961 by the United States Corps of Engineers as part of a beach erosion project. The Corps maintains the two jetties and breakwater structures pursuant to Public Law 780, 83rd Congress, Act of September 3, 1954. The Applicant has obtained the necessary approval from the Corps to install the walkway.
2. This activity involves lands which have NOT been identified as possessing significant environmental values pursuant to P.R.C. 6370, et seq. However, the Commission has declared that all tide and submerged lands are "significant" by nature of their public ownership (as opposed to "environmental significant"). Since such declaration of significance is not based upon the requirements and criteria of P.R.C. 6370, et seq., use classifications for such lands have not been designated. Therefore, the finding of the project's consistency with the use classification as required by 2 Cal. Code of Regulations 2954 is not applicable.

CALENDAR ITEM NO. C 26 (CONT'D)

3. Ventura County, as Lead Agency for the jetty walkway project, has determined that the walkway project is exempt from the requirements of CEQA pursuant to Class 4, Minor Alteration to Land, 14 Cal. Code of Regulations 15304.
