OTHER PERTINENT INFORMATION:

1. On May 31, 1989, the Commission granted prior approval to the City of Long Beach for \$235,000 in subsidence cost expenditures to be used in the conduct of vertical and horizontal measurements and studies in the Long Beach Harbor District during the 1989-90 fiscal year. The work consists of analysis and interpretation of data developed from twice yearly elevation and lineal surveys carried out through an established network of ground control points dispersed throughout the project area. The purpose is to detect the occurrence, if any, of subsidence of the land surface. The vertical (elevation) surveys are conducted each May and November and the horizontal (linear) surveys each February and August. No significant change in the Harbor District land surface was detected during 1989-90.

Expenditures for the vertical measurements and studies were less than the prior approval amount of \$225,000 by \$8,761.87(3.9%). The cost of the horizontal measurements and studies was less than the \$10,000 amount approved by \$4,537.95(45.4%). A staff audit confirms the incurred charges.

2. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (14 Cal. Code Regs. 15061), the Commission's review of this activity is exempt from the requirements of CEQA because it is not a "project" as defined by CEQA and the State CEQA Guidelines.

Authority: P.R.C. 21065 and 14 Cal. Code Regs. 15378.
