The subject contracts between the SLC, GBUAPCB, and the University of California Regents (U.C. CALENDAR ITEM NO. C30 (CONT'D)

2. At its January 27, 1993 meeting the GBUAPCB agreed to fund additional aeolian transport studies, a component of the originally approved experimental dust mitigation program in the amount of \$53,000. The new funding will allow for further laboratory wind tunnel testing at U.C. Davis. Copies of the prepared contracts are on file in the Sacramento office of the Commission.
3. The Commission, at its May 5, 1992 meeting also determined that the experimental program, as analyzed in EIR ND 587, State Clearinghouse No. 92032104, with concurrent adoption of a Mitigation Monitoring Program would not have a significant effect on the environment.
