PERMISSION IS GRANTED TO USE THE SUBJECT PREMISES FOR THE FOLLOWING DESCRIBED USES: A Use Permit to construct a private, five-berth boat dock in the AR-2(F) and DW-S zones, which exceeds the development standards listed in Section 235-147g of the Zoning Code; specifically, the proposed boat dock will extend 47 feet into the river at Mean Lower Low Water (MLLW) and along 110-feet of the shoreline on Georgianna Slough.

DESCRIPTION OF PREMISES: The property is located between Terminous Road and Georgianna Slough, approximately 350 feet south of Oxbow Drive, in the Delta community planning area.

CONDITIONS OF APPROVAL:

1. This action does not relieve the applicant of the obligation to comply with all ordinances, statutes, regulations and procedures. Any required subsequent procedural actions shall take place within 36 months of the date on which the permit became effective or this action shall automatically be null and void.
2. The development approved by this action shall be in substantial compliance with Exhibit "G" (Site Plan) and Exhibit "J" (Section View).
3. Secure all permits required from the federal and state agencies prior to construction.
4. Install 5 mph maximum speed and wake signs, to be enforced along the entire shoreline of the subject property. The size and placement of these signs shall be subject to approval by the Sheriff's Department.
5. Boats berthed at the dock shall not exceed the slip length.
6. Should any cultural resources, such as structural features, unusual amounts of bone or shell, artifacts, human remains, or architectural remains be encountered during any development activities, work shall be suspended and the Department of Environmental Review and Assessment shall be immediately notified at 440-7914. At that time, the DERA will coordinate any necessary investigation of the site with appropriate specialists as needed. The project proponent shall be required to implement any mitigation deemed necessary for the protection of the cultural resources. In addition, pursuant to Section 5097.98 of the State Public Resources Code, and Section 7050.5 of the State Health and Safety Code, in the event of the discovery of human remains, all work is to stop, and the County Coroner shall be immediately notified. If the remains are determined to be Native American, the Native American Heritage Commission shall be adhered to in the treatment and disposition of the remains.

FINDINGS:

1. The proposal is consistent with both the Sacramento County General Plan and Delta Community Plan in that no policy conflicts have been identified.
2. Staff has identified no effects from the proposal which would result in a significant detrimental impact on adjoining or neighboring properties if the conditions, as recommended by staff, are adopted.
3. The granting of the use permit will not, under the circumstances of the particular case, be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or working in the neighborhood of such proposed use or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the County, in that:
  - a. There is an existing speed and wake zone south of the subject property that may be extended to include the subject property and the channel of Georgianna Slough, thereby limiting potential hazards.
  - b. There is adequate navigable area remaining within Georgianna Slough even though the proposed dock exceeds the maximum extension standard for the waterway (i.e., there is 135± feet of unobstructed access remaining within Georgianna Slough after construction of the proposed dock, and it is unlikely that a similar dock could be constructed on the opposite side of the channel because of the zoning (AG-80(F) and agricultural character found in that area).
  - c. This project is less obtrusive than other similar requests that have been approved for this section of Georgianna Slough.
  - d. The length of the proposed dock will occupy only 29 percent of the shoreline for this parcel (i.e., 110 feet of the 385.5 feet of that portion of the parcel located at the MLLW line).
4. The proposal will not adversely affect the natural habitat, natural flow of the channel, stability of the levee, or create a safety/navigation hazard. It appears that all other required findings of Section 235-156 of the Zoning Code can be made in the affirmative.
5. The environmental document prepared for the project by the Department of Environmental Review and Assessment (DERA) was considered in the analysis and preparation of this report.
6. The property is located in the secondary zone of the properties covered by the Delta Protection Act and therefore, no special findings are necessary.

ENVIRONMENTAL DOCUMENT: Negative Declaration.

CAUTION: THIS USE PERMIT IS OF NO FORCE AND EFFECT UNTIL THE EXPIRATION OF A 10-DAY APPEAL PERIOD FROM AND AFTER THE DATE OF THE HEARING ON THE USE PERMIT.

THE ABOVE USE WILL NOT BE CONDUCTED TO CONSTITUTE EITHER A PUBLIC OR PRIVATE NUISANCE. VIOLATION OF ANY OF THE FOREGOING CONDITIONS WILL CONSTITUTE GROUNDS FOR REVOCATION OF THIS PERMIT. BUILDING PERMITS ARE REQUIRED IN THE EVENT ANY BUILDING IS PLANNED.
