**CONSIDER PRIOR APPROVAL OF SUBSIDENCE COSTS FOR
VERTICAL AND HORIZONTAL MEASUREMENTS AND STUDIES,
1997-98 FISCAL YEAR,
CITY OF LONG BEACH HARBOR DISTRICT,
LOS ANGELES COUNTY**

BACKGROUND:

The City of Long Beach Harbor Department conducts ground elevation and horizontal distance measurement surveys and studies twice each year throughout the Harbor District for the purpose of monitoring changes that may be attributable to subsidence. The project consists of vertical and horizontal measurements and studies in the City of Long Beach Harbor District between July 1, 1997 and June 30, 1998. A major portion of the work effort and cost is in the vertical measurement (elevation) surveys and studies. The City estimates the cost of the work to be:

Vertical Measurements and Studies	\$265,000
Consultants and Contingencies	\$50,000
Horizontal Measurements and Studies	<u>\$10,000</u>
	\$325,000

The estimated cost for vertical measurements and studies has decreased by \$285,000 from the current year's estimate of \$610,000. The decrease reflects the one-time purchase of a Global Positioning System (GPS) in FY 1996-97. Costs for consultants and contingencies are included for the integration of GPS survey data with historical differential leveling data.

FISCAL IMPACT:

Subsidence costs for vertical and horizontal measurements and studies conducted in the Long Beach Harbor District are deducted from the Long Beach tidelands oil revenues, with the prior approval of the California State Lands Commission in accordance with Chapter 138, Statutes of 1964, first extra session, Section 1(e).
