The proposed project is located in an area identified as Tahoe Yellow Cress (TYC) habitat. The TYC is an endangered plant species statutorily protected by the California Endangered Species Act. No TYC was found during the site-specific survey performed during the 2001 growing season. Should the demolition, construction or continuation of construction on the site extend into a subsequent growing season after June 14, the Applicant is required to contact staff of the California State Lands Commission to conduct a site-specific survey (survey to be conducted between June 15-September 30) for the presence of Tahoe Yellow Cress.
