**BACKGROUND:**

State Geothermal Resources Lease No. PRC 7845.2 (Lease) was issued to Santa Fe Geothermal, Inc., in July 1995, as a negotiated subsurface (no surface use) lease. In April 1997, Santa Fe was purchased by ESI Energy, Inc., and its name was changed to Silverado Geothermal Resources, Inc. (Silverado). In October 1999, Silverado was purchased by Calpine Corporation. Calpine is also the parent of Geysers Power Company, LLC, holder of six of the State's seven geothermal leases at The Geysers. The subject assignment will complete Calpine's efforts to consolidate its geothermal leaseholds under a single subsidiary.

**OTHER PERTINENT INFORMATION:**

- 1. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines [Title 14, California Code of Regulations, Section 15060(c)(3)], the staff has determined that this activity is not subject to the provisions of CEQA because it is not a "project" as defined by the CEQA and the State CEQA Guidelines.

Authority: Public Resources Code Section 21065 and Title 14, California Code of Regulations, Sections 15060(c)(3) and 15378.

- 2. Assignment forms and prerequisite filing fees have been paid by Geysers Power Company, LLC.
- 3. This activity involves lands which have NOT been identified as possessing significant environmental values pursuant to Public Resources Code sections 6370, et seq. However, the Commission has declared that all state school lands and submerged lands are "significant" by nature of their public ownership (as opposed to "environmentally significant"). Since such declaration of significance is not based upon the requirements and criteria of Public Resources Code sections 6370, et seq., use classifications for such lands have not been designated. Therefore, the finding of the project's consistency with the use classification as required by Title 2, California Code of Regulations, section 2954 is not applicable.
