**RESCISSION AND ISSUANCE OF A GENERAL LEASE – PROTECTIVE
STRUCTURE USE**

RESCINDING APPLICANT:

John C. Laing

APPLICANT:

John C. Laing

AREA, LAND TYPE, AND LOCATION:

175 square feet, more or less, of sovereign lands in the Pacific Ocean, adjacent to 4610 Opal Cliff Drive, near the city of Santa Cruz, Santa Cruz County.

AUTHORIZED USE:

Construction, use and maintenance of a two-foot wide cutoff stem wall and the removal of rip-rap as shown on the attached Exhibit A.

LEASE TERM:

Ten years, beginning August 22, 2008.

CONSIDERATION:

\$319 per year; with the State reserving the right to fix a different rent periodically during the lease term, as provided in the lease.

SPECIFIC LEASE PROVISIONS;

Liability insurance with coverage of no less than \$1,000,000.

OTHER PERTINENT INFORMATION:

1. Applicant owns the uplands adjoining the lease premises.
2. On August 22, 2008, the Commission authorized a General Lease – Protective Structure Use to John C. Laing. Since the meeting, staff of the Commission discovered that the Exhibit A (Site and Location Map), authorized with Item C23 of the agenda, was incorrect. Staff is now requesting that the authorization made by the Commission at its

August 22, 2008 meeting be rescinded and that a new General Lease – Protective Structure be issued to John C. Laing.

3. Applicant is one of three homeowners who proposes to construct a two-foot wide cutoff stem wall along the entire length of an existing seawall located at the tow of the bluff and along the beach seaward of 4640, 4630, and 4610 Opal Cliff Drive, near the city of Santa Cruz, Santa Cruz County.
4. The proposed project includes removal of rip-rap, which is located on sovereign lands adjacent to the toe of the existing seawall, which is not located on sovereign lands. The rip-rap part of a seawall structure was permitted by the California Coastal Commission in 1993 as toe scour protection, which has fallen into a state of disrepair. As a result, the toe of the existing seawall has been undermined. The rip-rap protection would be replaced by a two-foot wide cutoff stem wall along the entire length of the existing seawall. The cutoff stem wall will be embedded into the bedrock platform and structurally attached to the seawall. All visible components of the seawall will be colored so as to blend with the adjacent natural bedrock.

Staff has reviewed the document and determined that the conditions, as specified in Title 14, California Code of Regulations, section 15253 (b), have been met for the Commission to use the environmental analysis document certified by the CCC as a Mitigated Negative Declaration equivalent in order to comply with the requirements of CEQA.
7. This activity involves lands identified as possessing significant environmental values pursuant to Public Resources Code sections 6370, et seq. Based upon staff's consultation with the persons nominating such
