**SUBJECT:** Filing of Notice of Determination in compliance with Section 21108 or 21152 of the Public Resources Code.

**State Clearinghouse Number:** 2008071142

**Project Title:** Mitigated Negative Declaration No. 08-010 (Huntington Harbour Bulkhead Repair Project).

**Applicant Name and Address:** Natalie Chan, Tetra Tech Inc., 401 E. Ocean Blvd., Suite 420, Long Beach, CA 90814.

**Project Location (include county):** 30 single-family residential properties, Huntington Harbour, City of Huntington Beach, County of Orange.

**Project Description:** The purpose of the project is to restore the foundation of the bulkhead at 30 existing single-family residential properties in Huntington Harbour and provide toe protection to inhibit any future scouring or erosion, which may jeopardize the bulkhead's structural integrity. The bulkheads in Huntington Harbour are made of reinforced cast-in-place concrete and untreated timber piles supporting the footings. Due to the time span of design and construction, there are slight differences in bulkhead design among the properties. Some sections of the bulkhead have a cutoff wall below the bulkhead and some do not have a cutoff wall. Over the years, erosion due to localized tidal currents, recreational boat use and periodic maintenance dredging activities in the area have undermined the bulkhead, damaged the support piles and threatened the overall structural integrity. Properties located on the main channel show the greatest erosion levels.

The repair project would consist of three phases: pile repair, placement of sheet piles and installation of slope protection, although not all phases would apply to all properties. All three phases will be staggered and performed concurrently at certain stages to minimize total project duration. The total duration of the project is estimated to take 120 working days.
