EXECUTIVE OFFICER DEDRICK: Item 30 is the, again, the City of Long Beach, State Lands Commission, monitoring of seismic hazards. Moose Thompson would like to make a statement for the record.

MR. THOMPSON: Just for the record, I'd like to show the graphic presentation that confirms the statements we make here that theoe's no subsidence occurred as a result of the production from Long Beach.

The Long Beach unit boundaries are these boundaries 16 These are ISO elevation maps for the period of right here. about 19 years here, May of 1965, which was prior to the start of production along this unit. All of this area here is now higher than it was before we started production (in the Long Beach Unit. This is the last six months elevation map. that was run. It also shows increase in elevation.

23 We take about \$2 million a year and charge the cost 24 against the net profind that goes into a contingency fund 25 unless there is any judgment against the field contractor or

the state and the city and that fund is now \$40 or \$45 million. 2 COMMISSIONER ORDWAY: And we've had no claims? 3 0 MR. THOMPSON: No claims because of this particular 5 increase. MR. TAYLOR: The primary reason for this is that we have one expert who is going to have to testify in the arbitration proceedings which we anticipate will go for about 90 days and he is having to do a whole bunch of engineering work.

10

As a matter of fact, he's from Oklahoma and he's living out here now while he prepares for that. But in terms of cost effectiveness, the first rulings in this case have been \$30 million more this year from one ruling in the arbitration proceeding. So cost effectivewise it's very, @ very good for all of us.

ACTING CHAIRPERSON RASMUSSEN: Okay. Any other 13 questions on 35? 14

Thirty-five is approved.

Thirty-six.

MR. TROUT: Thirty-six is an augmentation of the contract with Lobel, Novins and Lamont, our Washington law firm, that has had to do additional work for the state on the Elk Hills, our negotiations with the federal government on the Elk Hills school lands situation which is worth, the last 21 0 fuel line into Elk Hills is worth about one and a half to 22 \$1.8 billion and we're trying to get the equitable title to 23 those lands in place from the Department of Interior. So 24 they should produce somewhere between \$75 and \$50 million a 25

year. COMMISSIONER OR WAY: Are there funds within your 2 budget for this? 3 MR. TROUT: I'm sorry. 4 COMMISSIONER ORDWAY: Are there funds within your 5 budget for this? MR. TROUT: No, not right now. If the Commission approves it, we would then go through with a Section 29 8 letter and a fund transfer. ACTING CHAIRPERSON RASMUSSEN: And this is not 10 reimbursable out of the Long Beach money?" 11 MR. TROUT: No, it is not. 12 13 EXECUTIVE OFFICER DEDRICK: This is, would add to the school Lands revenue, Commissioner. This is part of the 14 15 STRS 16 COMMISSIONER ORDWAY: Motion. 17 ACTING CHAIRPERSON RASMUSSEN: #1 right. Item 36. 18 Any other questions? EXECUTIVE OFFICER DEDRICK: I'm sorry. No, that's 19 right, it is STRS. 20 MR. MROUT: You're correct. 23 22 ACTING CHAIRPERSON RASMUSSEN: " Thirty-six is 23 approved. 24 Thirty-seven. MR. TROUT: Thirty seven is authority to solicit a 25
